

ARCTIC INTRODUCES NEW FREEZER 34 GENERATION

ARCTIC today introduced the new Freezer 34 air cooler series. Development of the new Freezer series focused on increasing cooling capacity. With static pressure optimized P-fans and the improved heatsink, the Freezer 34 series offers high quality products with high-powered performance. The series consists of the standard Freezer 34 model; the Freezer 34 CO, a new tower CPU cooler; the Freezer 34 eSports; and the Freezer 34 eSports DUO.

The Freezer 34 coolers come with all the perks of ARCTIC's high static pressure P-fans: an extended shelf life, a wide RPM range, lower power consumption, high quality bearings and less vibration. Plus, when the PWM signal falls below 5%, the passive 0 dB mode is activated.

With newly developed fans, a streamlined cooling fin design, and offset direct-touch heatpipes that distribute heat more efficiently, the Freezer 34 delivers robust cooling for high-end processors with up to 18 cores. During internal testing, at a normalized 28db(A) noise level, the Freezer 34 models achieved results up to 4° C cooler than their predecessor series.

The improved mounting system of the Freezer 34 reduces the assembly time to a few minutes and is compatible with both Intel and AMD sockets. In addition, its compact size ensures optimum RAM compatibility, even with RAM modules that have larger heatsinks.

CLASSIC, SPORTY, PUSH-PULL OR EXTRA ENDURANCE

Freezer 34

Freezer 34 eSports

Freezer 34 eSports DUO

Freezer 34 CO

The Freezer 34 CO differs from the Freezer 34 only by the addition of a high-precision and extremely durable dual ball bearing, which was specially developed for continuous operation.

The eSports models – Freezer 34 eSports and Freezer 34 eSports DUO – are equipped with powerful 120 mm BioniX P-fans and come in four colors. The two BioniX P-fans of the Freezer 34 eSports DUO work in push-pull configuration, while a thermal coating on the heatsink provides an additional performance boost.

About ARCTIC

ARCTIC is a leading manufacturer of silent PC coolers and components and has initiated and sustainably influenced the trend towards quiet cooling systems. Besides a wide range of CPU and GPU coolers, ARCTIC offers high quality monitor mounts as well as an audio product line. The company, run by founder Magnus Huber, has locations in Germany, Hong Kong and the USA and convinces pc enthusiasts in over 45 countries with innovative and user-friendly products, high quality and fair prices. For more than 15 years ARCTIC stands for comfortable computing, excellent service and personal support.
